

3004 Aluminum Foil

3004 Aluminum Foil Aluminum Jumbo Roll Description:

3004 aluminum foil is suitable for processing single-cavity aluminum foil lunch boxes. The downstream process has good formability. Compared with other brands of aluminum products, it has high strength and deformation resistance.

3004 aluminum foil is a widely used raw material for honeycomb cores, with a thickness of 0.03-0.2mm. The 3004 aluminum foil produced by Mingtai Aluminum has the advantages of clean surface, good flatness, high strength, corrosion resistance and aging resistance. It is the best choice for making honeycomb materials ideal material.
