

## 3104 Aluminum Coil

### 3104 Aluminum Coil Description:

3104 aluminum coil is a deformed aluminum alloy with tensile strength greater than or equal to 275MPa and elongation up to 20%. It has good deep drawing performance and is suitable for thinning, stretching and lightening to reduce material consumption. The process requirements for tank materials are strict. The company strictly controls each process so that the product has suitable strength and formability.

### Strength of Mingtai Aluminum Production 3104 Aluminum Coil

1. Actively develop green and low-carbon new aluminum industry to realize recycling of aluminum resources;
2. Large supply and stable sales;
3. Complete specifications. Mingtai Aluminum can customize and produce 3104 aluminum coils of various tempers according to customer needs;
4. Direct-selling aluminum coil manufacturers have no middlemen to earn the price difference, and the product price has a great advantage;
5. Monthly output can be up to 2600 tons.

### Technical Parameter of Mingtai Al. 3104 Aluminum Coil

Alloy	3104
Temper	O,H12,H14,H16H18,H19,H22,H24,H26,H28,H32,H34 H36,H38
Thickness (mm)	0.2-8.0
Width (mm)	100-2650
Length (mm)	c

### Countries we have exported our products to:

<b>Aluminium 3104 Coil Exporters:</b>				
Vietnam	The UK	Indonesia	Tunisia	Poland

South Korea	Kuwait	Germany	Italy	Ireland
Netherlands	Serbia	Brazil	Sweden	Pakistan

**Aluminum products of Mingtai Aluminum meet the export popular**

Hard aluminum coils can generally be packaged in a good frame, and the packaging should meet the storage and transportation requirements. The top of the wooden frame is made of wood, consisting of upper and lower pieces of wood. The height of the lower wood should meet the working requirements of the car. The wood side is made into a radial shape corresponding to the upper and lower sides and fixed with screws. The length of the screw should be lower than the upper arc face, so as not to puncture the aluminum coil.
