

5454 Aluminum Coil

5454 Aluminum Coil Metal Description:

5454 aluminum is an alloy in the wrought aluminum-magnesium family. It is primarily composed of aluminum, magnesium, and a small amount of manganese, which enhances its strength and corrosion resistance.

The 5454 aluminum alloy is often used in high-strength structural applications such as pressure vessels, marine applications, and welded structures. It has excellent resistance to corrosion and is well-suited for use in harsh environments. Additionally, this alloy has good formability and weldability properties.

Aluminum coils made from 5454 alloy are commonly used in the automotive industry, specifically for body panels and other structural components. They can also be used in other applications such as transportation equipment, industrial machinery, and construction materials.

Strength of Mingtai Aluminum Production 5454 Aluminum Coil

1. Advanced equipment and technology: Mingtai Aluminum has advanced equipment and technology for producing high-quality aluminum coils. We have invested heavily in R&D to continuously improve their products and manufacturing processes;
2. Fast and reliable delivery: Mingtai Aluminum has a global distribution network and can deliver their products quickly and reliably to customers all over the world;
3. Excellent customer service: Mingtai Aluminum has a team of experienced professionals who provide excellent customer service and support to their customers;
4. Monthly output can be up to 2000 tons.

Technical Parameter of Mingtai Al. 5454 Aluminum Coil

Alloy	5454
Temper	O,H12,H14,H16H18,H19,H22,H24,H26,H28,H32,H34

	H36,H38
Thickness (mm)	0.2-8.0
Width (mm)	100-2600
Length (mm)	c

Countries we have exported our products to:

Saudi Arabia	Oman	Kuwait	Netherlands	Pakistan
Bahrain	Qatar	UAE	Africa	China
Nigeria	Mexico	Canada	Venezuela	United Kingdom
United States	South Africa	Malaysia	Bangladesh	Turkey
Singapore	Sri Lanka	Australia	Brazil	Germany
France	Italy	South Korea	Poland	Belgium

Packing Detail of 5454 Aluminum Coil

Our products are packed and labeled according to the regulations and customer's requests. Great care is taken to avoid any damage which might be caused during storage or transportation. The standard export packaging, plastic film or craft paper covered. wooden case or wooden pallet is adopted to protect products from damage during the delivery. Also, clear labels are tagged on the outside of the packages for easy identification of the product I. D. and quality information.
