

5754 Aluminum Coil

5754 Aluminum Coil Metal Description:

5754 aluminum coil is a medium-strength aluminum alloy with excellent corrosion resistance. It has good weldability and formability. This aluminum alloy contains magnesium as its main alloying element, which enhances its strength and improves its machinability.

The coil form of 5754 aluminum provides ease of transport and storage, and it can be easily processed into various forms such as sheets, plates, and strips. The coil is available in various thicknesses, widths, and lengths, and can be customized to meet specific requirements.

Strength of Mingtai Aluminum Production 5754 Aluminum Coil

- 1.High quality: Mingtai Aluminum uses advanced equipment and technology to produce high-quality 5754 aluminum coils that meet international standards;
- 2.Excellent performance: The 5754 aluminum coil produced by Mingtai Aluminum has excellent corrosion resistance, weldability, and processing performance, making it suitable for use in various industries;
- 3.Wide range of applications: Commonly used in the automotive, marine, and aerospace industries due to its high strength and durability;
- 4.Customization: Mingtai Aluminum can produce it in various sizes and thicknesses according to customer requirements;
- 5.Competitive pricing: Mingtai Aluminum offers competitive price, making them a cost-effective choice for customers;
5. Monthly output can be up to 8000 tons.

Technical Parameter of Mingtai Al. 5754 Aluminum Coil

Alloy	5754
Temper	O,H12,H14,H16H18,H19,H22,H24,H26,H28,H32,H34 H36,H38
Thickness (mm)	0.2-8.0
Width (mm)	100-2600

Length (mm)	c
-------------	---

Countries we have exported our products to:

Saudi Arabia	Oman	Kuwait	Netherlands	Pakistan
Bahrain	Qatar	UAE	Africa	China
Nigeria	Mexico	Canada	Venezuela	United Kingdom
United States	South Africa	Malaysia	Bangladesh	Turkey
Singapore	Sri Lanka	Australia	Brazil	Germany
France	Italy	South Korea	Poland	Belgium

Packing Detail of 5754 Aluminum Coil

Our products are packed and labeled according to the regulations and customer's requests. Great care is taken to avoid any damage which might be caused during storage or transportation. The standard export packaging, plastic film or craft paper covered. wooden case or wooden pallet is adopted to protect products from damage during the delivery. Also, clear labels are tagged on the outside of the packages for easy identification of the product I. D. and quality information.
