

5A06 Aluminum Sheet

5A06 Aluminum Alloy Sheet - Complete Range

5A06 aluminium sheet is 5-series Al-Mg anti-rust aluminium, the content of Mg is higher than other 5-series alloys, and belongs to the non-heat treatment alloy, through cold processing to improve its strength. In the state of annealing and extrusion, 5A06 aluminium plastic is good. Besides, 5A06 aluminium alloy has relatively high strength, good machinability and excellent weldability. Among them, by gas welding and spot welding, the welding joint strength can reach 90~95% of the matrix strength. And the gas tightness and weld plasticity are very good in argon arc welding. Therefore, the 5A06 aluminium sheet is widely used in welding parts such as ships, automobiles, and subway light rail, as well as a variety of pressure vessels, moulds, and so on.

With two decades of aluminum sheet production experience, Mingtai Al. can produce and supply high-quality 5A06 aluminum sheets of different sizes and tempers.
