

7050 Aluminum Sheet

7050 aluminum plate - 7050 aluminum sheet price

7050 aluminum sheet is a high-strength heat-treatable alloy. It is based on 7075 aluminum alloy, which increases the Zn, Cu content and Cu / Mg ratio to increase the strength, and it replaces Cr with Zr to overcome the quenching sensitivity problem and inhibit recrystallization. 7050 aluminum sheet is an alloy that has been existing for decades and is known for its ability to remain strong over time. Although other alloys are available which are stronger on a one-off comparison basis, they do not necessarily prove the longevity which the 7050 products can offer.

As a professional manufacturer and wholesaler of aluminum sheets, Henan Mingtai Aluminum can provide 7050 aluminum sheets with various specifications, superior quality, competitive price, and fast delivery. Henan Mingtai Aluminum has a huge stock of common specifications, as well as special sizes, that can be customized.
